Goals (2017-2019)

Digitalization of Biobanks

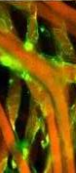

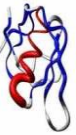

- To create a prototype of a digital framework
- To setup an interactive digital consultation system
- To define a minimal-information set from the pathological reports

Harmonization of work-flows and data management

- To compare work-flow and standard operation procedures (SOPs) at the partner sites
- To compare the SOPs with international standards
- To enable an interactive harmonization of SOPs at the partner sites

Dissemination of biobank-know-how and public relations

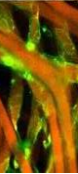

- To set-up strategies to train the handling of the digital pathology framework
- To set-up strategies to train the applications of SOPs
- To set-up strategies for student educational programs regarding biobanking
- To set-up strategies for the dissemination of knowledge about biobanking in the public

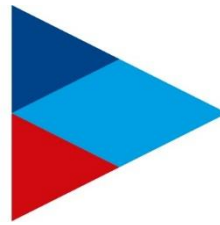

Goals

...to give an example for dynamic European biobank-cooperation

and for a functional biobank-network which allows common projects

Thank you
